WATER RATES IN 161 KANSAS CITIES

Together with a directory of

All the Waterworks Plants in the Cities of Kansas.

Compiled and mimeographed by the Municipal Reference Bureau

of the University Extension Division

University of Kansas.

February 10, 1921.

Lawrence, Kansas.

336.7
K134w

INTRODUCTORY NOTE

This compilation of water rates in the cities of Kansas has been made possible by the cooperation of the city officials of this state.

It is the purpose and duty of this information service to collect such information as will be useful to the city officials in the administration of their city affairs.

The value and usefulness of this service for city officials depends on the cooperation of the cities and city officials.

When a city official has a difficult problem to solve for his city, or is in doubt about a legal question or ordinance form, a detailed description of the problem or question sent to this office will secure prompt and reliable assistance.

It is also necessary that city officials cooperate with this office by sending in the ideas, plans and systems which they have found helpful in the administration of their duties

Annual city reports and ordinance books are very useful. Copies of new ordinances, city plans and any other new and original undertaking will be valuable to have on file. The pooling of municipal information in this office greatly increases the resources of the secretary for answering inquiries and preparing bulletins. This information is also made available for publication and distribution to all the city officials thru KANSAS MUNICIPALITIES, the city officials' magazine, published by the League of Kansas Municipalities.

John G. Stutz,
Secretary.

Lawrence, Kansas.
February 10, 1921.

*Populations taken from 1920 census
All other populations taken from
1915 Report of the Kansas State
Board of Agriculture.
